

v4.0

v3.9.1

v4.0-RC2

Experimental

New Class

New Interface

New Enum

Search

B

```
org > eclipse > isParentOf(...)

private static boolean isParentOf(char[] folderName,
char[] fileName) {
  if (folderName.length >= fileName.length) {
    return false;
  }
  if (fileName[folderName.length] != '/') {
    return false;
  }
}
```

A

```
org > eclipse > shouldIgnoreOptionalProblems(...)

if (folderNames == null || fileName == null) {
  return false;
}

for (int i = 0, max = folderNames.length; i < max; i++) {
  char[] folderName = folderNames[i];
  isParentOf(folderName, fileName);
}
return false;
}
```

Branch - v4.0

Adds parallelizable optimizer module

D

Extract isParentOf Logic into its own method.

Changes continues in for loop to return...

[Extract Method] Body of for loop to isPar...

Changes return type of isParentOf to boo...

[diff of all](#)

E

```
org > eclipse > shouldIgnoreOptionalProblems(...)

if (folderName.length >= fileName.length) {
  continue;
}
if (fileName[folderName.length] != '/') {
  continue;
}
}
```

Branch - v3.9.1

Patch for 3.x optimizer race condition
